*1 The screening result was found in the inconclusive region, thus the further wet chemistry tests are suggested.

*2 The screening result was detected above the screening limits, thus the further wet chemistry tests are suggested.

*3 The screening result of Cr was found in the inconclusive region, thus the chromium (VI) content have been confirmed with EN 62321:2009 Annex.

*4 The screening result of Cr was found in the inconclusive region, thus the chromium (VI) content have been confirmed with ISO 17075:2007.

^ The result will reflect the total chromium and total bromine present in the sample. The presence or absence of hexavalent chromium, PBB, or PBDE shall be confirmed with Reference to EN 62321:2009
